NJDEP SOLID WASTE DECAL INFORMATION & VOLUME COMPUTATION FORMULA

In accordance with N.J.A.C. 7:26 3 et seq., the New Jersey Department of Environmental Protection is responsible for issuing solid waste registration decals. Each registrant (transporter) is being assigned a unique five-digit New Jersey Department of Environmental Protection (NJDEP) registration number. All vehicles used in the collection or transportation of solid waste must carry the current NJDEP registration certification (cab card) in the solid waste vehicle. Each piece of registered equipment will be issued one (1) decal. Accurate records of all waste picked up and disposed (by quantity and waste ID numbers) must be kept.

N.J.A.C. 7:26-3.4 (h) requires that all registrants **display in letters and numbers at least three inches in height the NJDEP number, the company/trade name and the capacity of the vehicle.** This information must be **permanently displayed by the registrant on the driver's side of each registered solid waste vehicle and container in contrasting colors** so as to be visible to the operator of the solid waste facility.

EXAMPLE OF VOLUME COMPUTATION: The capacity in cubic yards can be obtained from the manufacturer or by the following method:

MEASURE THE:	EXAMPLE
Length of vehicle bed (in feet*) "L"	3 ft., 4 in. = 3.33 ft.
Width of vehicle bed (in feet*) "W"	3 ft., 6 in. = 3.50 ft.
Height of vehicle bed (in feet*) "H"	*Do not round to less than two decimal places.

The formula is: $L \times W \times H = \text{Volume in cubic feet.}$

Then divide the cubic feet by 27: $\text{Volume in cubic feet} / 27 = \text{Volume in Cubic Yards}$

Round off to the nearest cubic yard.

The registrant is responsible for the accuracy of the volume reported within 0.50 cubic yard regardless of the method used to obtain or calculate the volume.
